Design a web site using HTML tags and apply appropriate styles with the following Project Structure & Requirements

1. **Home Page:**
   - Introduce yourself with a welcome message.
   - Include a navigation menu linking to other sections.
2. **About Page:**
   - Provide a brief biography, educational background, and career goals.
   - Include a personal image.
3. **Profile Page:**
   - Display key personal and professional details.
   - Showcase skills and strengths using a structured format.
4. **My Achievements Page:**
   - List awards, certifications, and significant accomplishments.
   - Use a structured table format to present the details.
5. **My Interests Page:**
   - List hobbies and personal interests.
   - Embed a related YouTube video.
6. **Google Calendar Integration:**
   - Embed a Google Calendar to display personal events or availability.
7. **Contact Us Page:**
   - Provide a contact form for users to reach out.
   - Include fields for Name, Email, and Message.
8. **Feedback Form:**
   - Allow visitors to submit feedback through a form.
   - Include options for rating and additional comments.
9. **Google Maps Integration:**
   - Embed a Google Map to display a location of choice (home, workplace, favourite place).
